

Transferable Skills Course Program

CONFIRMATION OF ATTENDANCE

Carlo Emiliano Mora Carrera

successfully completed the course

Scientific Writing – Effective Communication

This course familiarized the participants with the general principles of scientific writing and communication. The forms of writing covered included research proposals, primary research papers, conference abstracts, and theses.

The course included:

- Short interactive lectures introducing the principles of scientific communication
- Analysis of published/existing work to extract and apply key writing principles
- Practical and theoretical exercises on all aspects of planning, writing and revising a scientific text
- Grammar exercises

Contribution of the participant:

- Writing drafts of different types of scientific writing
- Analysis and correction of drafts written by course participants
- Analysis and correction of published work
