

Transferable Skills Course Program

CONFIRMATION OF ATTENDANCE

Carlos Emiliano Mora Carrera

successfully completed the webinar

Effective Visual Communication of Science

Preparation by the participants:

- **Select and submit** your scientific figures, and slides.

Content of the course:

- **Fundamentals of visual communication** that underlie all scientific communication and help make complex research ideas and results easier to understand. Includes knowledge of visual perception, layout, eye flow, colors, and typography.
- **Applying the approaches** to different types of science communication including slide presentations and conference posters.
- **Draw a graphical abstract** that visually presents your research. Use visual communication terminology to give and receive feedback from other scientists.
- **Give and receive feedback** on posters, slides, and figures prepared by you and other participants.

Facilitator: Jernej Zupanc
